**NASA THESAURUS  
COMBINED FILE POSTINGS  
STATISTICS**  
(Cumulative)

# INTRODUCTION

The NASA Thesaurus Combined File Postings Statistics is published semiannually (January and July) This alphabetical listing of postable subject terms contained in the NASA Thesaurus is used to display the number of postings (documents) Indexed by each subject term from 1968 to date. The postings totals per term are separated by announcement or other media into *STAR*, *IAA*, *COSMIC*, and *OTHER*, columnar entries covering the NASA document collection (1968 to date).

This is a cumulative publication, and except for special cases, no reference is needed to previous issuances. Retention of the January 1992 issue could be helpful for book information. With the July 1992 issue, NALNET book statistics have been replaced by COSMIC statistics for NASA funded software.

File postings statistics for the Alternate Data Base covering NASA collection from 1962 through 1967 were published on a one-time basis in September 1975. Subject terms for the Alternate Data Base are derived from the subject Authority List, reprinted 1985, which is available upon request.

The distribution of 19,697,748 postings among the 17,446 NASA Thesaurus terms is tabulated on the last page of the NASA Thesaurus Combined File Postings Statistics.

NASA Center for AeroSpace Information, January 1993
